ABSTRACT OF THE DISCLOSURE

A system that can register a plurality of kinds of fonts for one external character and can create an external-character file for each font, in a short time, is provided.

The external-character font creation system includes: a display unit 2 for displaying an externalcharacter code registration screen based on an externalcharacter code table 6 that shows a correspondence between an external-character code of a external character to be registered and a master code; an edit unit 11 for registering a master code corresponding to an external-character code in the external-character code table 6; a font selecting section 13 for selecting a plurality of external-character fonts of the externalcharacter file by using a font selection screen for selecting an external-character font of an externalcharacter file to be created based on a correspondence relationship between a master font and an externalcharacter font; and an external-character file creating section 16 for creating an external-character file of the external-character font selected by the font selecting section 13.
